## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments, see Remarks, filed 26 August 2005, with respect to Claim 14 have been fully considered and is persuasive. The rejection of Claim 14 has been withdrawn.

Applicant's arguments filed 26 August 2005, with respect to Claim 15 have been fully considered but they are not persuasive. Regarding Claim 14, the applicant asserts that the light transmitting multilayer film disclosed in Kobayashi does not traverse a light path between the reflector and the convex lens. The office disagrees with this assertion and maintains that the transmitting film (24) in Figure 8 does traverse a light path between the reflector (16) and the convex lens (14). Therefore the rejection under U.S.C. 102(b) is maintained (see below).

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 15 is rejected under 35 U.S.C. 102(b) as being anticipated by Kobayashi. Kobayashi discloses in Figure 8, an infrared lamp with a tubular lens holder (12), light

source (20), a convex lens (14) forward of the reflector, an IR transmitting film traversing a light path between the reflector and convex lens (14), and an infrared light transmitting film free region being provided on an outer periphery of the light transmitting film in which the free film region can be adjusted accordingly to dilute the red light emitted from the convex lens.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: Regarding Claim 14, the prior art does not teach an infrared light radiating lamp having a means for blocking light in a direct path between the light source and a IR light transmitting free

Art Unit: 2875

film area wherein the free film area is located on an outer periphery of a light transmitting film traversing a light path between the reflector and convex lens.

Furthermore, the prior art does not teach or suggest a an infrared lamp having a light transmitting film free region located on the outer periphery of the IR transmitting layer so that the visible light is emitted from a rim portion of the convex lens.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
